## CSS322 - Quiz 3

Name: $\qquad$ ID: $\qquad$ Marks: $\qquad$

## Question 1 [5 marks]

Calculate the following. A calculator is not allowed. Show calculations/explanations.
(a) $\phi(23)$ Answer: $\qquad$ [1.5 marks]
(b) $\phi(25)$ Answer: $\qquad$ [1.5 marks]
(c) $(40 \div 23) \bmod 80[2$ marks]
(d) $3^{32} \bmod 80$ [Bonus: 2 marks]

## Question 2 [2 marks]

Circle one or more of the following 5 algorithms that can be used in or as part of a PRNG:

Blum-Blum-Shub
Linear Congruential Generator

Triple DES
AES in Counter Mode

## Question 3 [3 marks]

Assume when encrypting 3-bit plaintext with a block cipher with key $K$, the following ciphertext is obtained:

| $P$ | $C$ |  | P | C |
| :---: | :---: | :---: | :---: | :---: |
| 000 | 110 |  | 100 | 000 |
| 001 | 001 |  | 101 | 011 |
| 010 | 111 |  | 110 | 101 |
| 011 | 010 |  | 111 | 100 |

The following ciphertext was encrypted with the above cipher with key $K$ in counter mode (initial value 0): 100110000 What is the plaintext?

Answer: $\qquad$
